Q2: What type of battery does the Polaroid 104 use?

A2: The Polaroid 104 typically uses a PX625 battery (sometimes referred to as a 23A or similar equivalent). Be sure to use a fresh battery to ensure the flash operates correctly.

Q3: Can I use modern Polaroid film with the Polaroid 104?

A3: The Polaroid 104 is designed for Type 107 and Type 108 films. While some modern instant films might *physically* fit, they are not guaranteed to function correctly due to differences in film chemistry and the camera's metering system.

Q4: My photos are consistently underexposed. What should I do?
