FAQ: Addressing Common Questions About Brushing Teeth Visual Schedules

Q1: Are brushing teeth visual schedules only for children with special needs?

A1: While particularly beneficial for children with autism, ADHD, or developmental delays, visual schedules can be helpful for any child, especially younger ones who are still learning routines. They provide a clear and consistent guide, reducing confusion and promoting independence. Even typically developing children may benefit from the structure and predictability a visual schedule offers.

Q2: How long should a child use a brushing teeth visual schedule?

A2: The duration depends on the child's individual needs and progress. Some children may only need it for a few weeks or months, while others may benefit from it for a longer period.
